

ECOGREEN ONLINE COURSE

THEME 2 – SELF- LEARNING ACTIVITIES

ACTIVITY 1

Go to the website of exploring economics and read up on the chapter of ecological economics:
Ecological Economics | Exploring Economics (exploring-economics.org).

How does this understanding of economics differ to the one you have learned so far? Compare the two and present it to your class.

Read up on the other schools of economics – find out which of the schools fits best to your current understanding of economics. Try to compare it again to ecological economics and think of what is necessary to make your understanding of economics an ecological one.
