

## ECOGREEN ONLINE COURSE

### THEME 4 – POST-VIDEO QUIZ QUESTIONS

1. Why is today's industrial agriculture a big part of unsustainable economics?
  - Because the energy and material input for today's industrial agriculture is far more than its output
  - Because it does not produce high enough yields to feed the world
  - Because it accounts for 80% of all deforestation in the world
  
2. What are core foundations of industrial agriculture?
  - Large-scale production
  - Profit orientation
  - High use of manual labour
  - Dependent on chemical fertilizers and pesticides
  - Frequently linked to violence and human rights abuse
  
3. What are core elements of community supported agriculture?
  - producers stand in direct contact with consumers and vice versa X
  - a community who shares both the benefits and risks of food production X
  - Because wealthy members pay their fair share others can afford to pay only half or less X
  - The community exists only for the goal of efficient food production
